

THE INTERNATIONAL HEALTH AND DEVELOPMENT PORTAL

A Partner to Promote Global Health and Sustainable Development

THE INTERNATIONAL HEALTH AND DEVELOPMENT PORTAL, is not for profit institution promoting *Sustainable Development Goals* (SDGs), with special focus on these 7 Goals: 1, 3, 4, 5, 10,16 and 17. Established in October 2006, in *The Commonwealth of Massachusetts* (USA), the collaboration has been actively working to advance the causes of peace, health and development. It has vision to build infrastructure in developing countries and to create meaningful opportunities for girls and women to participate in global philanthropy.

We embrace the tremendous diversity of people, religions, and cultures around the world. In support of this belief, we have established academic and cultural focus at iconic institutions around the globe, to nurture our common interests and potential. By supporting reproductive health and research, open dialogue and objective analysis, we lay the ground work for mutual understanding among nations.

All over the world we all provide care to a multicultural society.

Preparing the next generation of healthcare providers in the international arena, deepening their knowledge and improving the skill set for a career in global health and global governance is urgently needed. Programs are needed for healthcare professionals to provide them with academic training and practical knowledge to assist them in providing national and international healthcare.

We have the knowledge, means and motivation to act.

THE OBJECTIVES, of the International Health and Development Portal are:

- To establish collaboration with programs in low- and middle-income countries, to accelerate SDGs 1, 3, 4, 5, 10, 16 and 17 in association with the developed countries, of mutual benefit and mutual respect.
- To catalyze collaborative networks – cutting across disciplines, sectors and borders.
- To place public-health on the top of the agenda.
- To seek science and technology-based solutions to development challenges.
- To disseminate and provide access to evidence-based research and to develop initiatives in Health & Education, worldwide.
- To plan, promote and implement best practices in both developed and developing countries, for SDGs 1, 3, 4, 5, 10, 16 and 17.

The Portal supports capacity building for e-Health and e-Governments applications worldwide and look forward to development and the use of norms and standards.

Proceeding in this way, strengthening capacity, preserving cultural integrity and increasing the access to such technologies, for those who need it most, must remain the goal. Fostering partnership for communication and coordination can strengthen the Safe-Motherhood projects and programs.

PURPOSE

Improving Global Partnerships for Education and Health

Improving Global Partnerships for Education and Health

[Improving Global Partnerships for Education and Health | High-Level Political Forum 2022 \(un.org\)](#)

[Women's Health and Education Center \(WHEC\)](#)

Women's Health and Education Center (WHEC) has a unique role to play in strengthening the health and educational systems, in rich and poor countries alike. Technology and innovation in learning are creating exciting new opportunities to accelerate progress towards health-for-all and education-for-all in every country. We are in midst of a digital proliferation around the globe. The Objective of this Side Event is to share experiences of various technological solutions in improving the accessibility of education and health systems, as well as to learn from the experts how to best apply technology in the learning process. Government commitment is necessary - A long-term plan that is binding on all parties at all times.

WHEC's e-learning, e-Health and e-Government [initiative](#)

Let us take this opportunity to brief you on some positive developments that have taken place in the past few years in our program (Continuing Medical Education) development cluster. Meet our network – circling the globe every day – for health and education.

The purpose of the Continuing Medical Education (CME) is to provide challenging curricula to assist healthcare professionals to raise their levels of expertise while fulfilling their continuing education requirements, thereby improving the quality of healthcare.

The philosophy behind this purpose is based on the belief that continuing education is a life-time commitment requiring knowledge of current trends and developments in the science, technology and economics of healthcare. GLOBAL STRATEGIES, of International Health and Development Portal

LINK (Learning, Innovating, Networking for Knowledge) Access Project,

<http://www.womenshealthsection.com/content/documents/LINK-Access-Project.pdf>

There is new focus on learning and building competencies, bringing lifelong opportunities. International Health and Development Portal, is serving and offering high-tech environments, providing learning opportunities for leaders, educators, researchers, health-workers in 227 countries and territories.

Countries, Territories & Areas Names

[Click here for more info \(PDF\)](#)

LINK Access Project, aims to provide access to quality health and educational programs, in collaboration with the World Health Organization (WHO) and United Nations Educational, Scientific, Cultural Organization (UNESCO). The International Health and Development Portal, promotes and implements best practices in both developing and developed countries. It provides free access to educational and reproductive health research programs and courses to Least Developed Countries (LDCs), identified by United Nations Development Programme (UNDP).

Achieving United Nations' 2030 Agenda

The International Health and Development Portal, addresses this issue by reinforcing the coordination among key international organizations and national actors working on education and healthcare policies, by bringing more coordinated support to UN Member States.

Equally important, these global initiatives on **Education & Health Platform** (<http://www.WomensHealthSection.com>), enhance and support authorities at country level to elaborate strategies, which will strengthen national education system and healthcare policies. The teaching and learning components of national education sector and health-sector plans will also be improved.

Internet Class Rooms – Building the Capacity to Care

Hope in Africa

Imagine students in developing and developed countries simultaneously reviewing the same medical education and learning from each other.

That is e-learning at its best in an Internet Classroom, and with this goal

International Health and Development Portal, and the Department of Public information of the United Nations (UN) launched this e-Learning Platform, on 24 October 2002. This Portal provides comprehensive overviews of topics such as violence against women, obstetrics, gynecology, prevention of obstetrical fistulae, healthcare policies, and newborn care. It is available in six official languages of the United Nations. The translations, we believe, will increase understanding of the medical literature and help foster networks of healthcare providers around the world.

Our brief History -

<http://www.womenshealthsection.com/content/documents/Our-Brief-History.pdf>

Advancing sustainable development for more than the last two decades, and promoting United Nations 2030 Agenda, we have a unique role to play in strengthening the health and educational systems, in rich and poor countries alike. Our special focus is on SDGs 1, 3, 4, 5, 10, 16 and 17.

We believe, on this path efforts never go to waste, and there is no failure.

We invite you to enjoy these courses for your personal development or share this publication with other healthcare providers.
