Strengthening Global Trust in Digitalization and Accelerating Sustainable Development Goals

Date: 09 July 2024; Time 1:15—2:30 pm (EDT)

The objectives of this Side Event are:

1. To track global digital cooperation - Need for an ethical, and transformative framework for generative artificial intelligence (AI) that is not extractive, exploitive, centralized and corporatized, but embodying values of a humane and transformative paradigm based on democratic and distributive integrity.
2. To track on innovation and development – A dedicated, multilateral hub – linked to regional and national nodes and mechanisms.
3. Technical and policy capabilities for future-ready innovation ecosystems – training policy makers on an ongoing basis.
4. Lessons learned from the shortcomings of the technology access for the Least Developed Countries (LDCs); and
5. The financing track for innovation and frontier technology and science impetus.
